syngenta *flowers*[®]

TM

Welcome

Growing strong – together!

It's time for a revolution in the plant experience! We aim to inspire people to connect with stunning yet easy to manage flowers, through **new and improved varieties** that ensure your offer matches modern lifestyles and demands. Of course, some things will always stay the same, such as our **award-winning genetics** and **proven services** that you and your customers can rely and build upon.

Our **2017 seeds catalogue** is full of innovations and novelties that produce beautiful flowers, with less time, effort or resources. Discover our groundbreaking Cyclamen SeeWhy®, best performing Petunia grandiflora Tritunia and the incredible seed raised Sanvitalia Queen of Sunlight! Just to name a few...

Plus, as we mark **our 150th anniversary** throughout the year we'll show you more about how our approach is designed to support and delight you and your growers. After all, our age isn't 'just a number': it's experience, trust, know-how and partnership.

We look forward to continuing our successful partnership with you in 2017,

Jurgen Hoogland
Head of Business International

Be inspired – grow strong with Syngenta!

Obsession® Cascade

NEW
2017

Verbena Hybrida

Obsession® Cascade is a new class of seed verbena with a spreading and mounded habit ideal for automated production in large packs and small pots, for landscape use, or for high volume retail promotions in single crop or combination baskets. Plants are well branched, requiring no pinch. Large, showy flowers come in both the core and novelty twister colors demanded at retail. Bred to be very tolerant to Powdery Mildew, Obsession® Cascade will continue to perform and flower in the garden well after many other varieties have succumbed to disease.

WonderFall®

Viola x wittrockiana (Pansy)

WonderFall® is the first large flowered Pansy with a truly trailing habit. With its extra vigor, plants fill pots quickly and are ideal for large containers and balcony plantings. In the landscape, its spreading habit covers more ground than traditional pansies and provides maximum color impact. WonderFall® is suitable for 12 cm pots and larger and especially hanging baskets and window boxes.

Germination rate	90%
Product form	Raw, PreNova®
Pot size	12-14 cm/ hanging basket
PGR	Yes
Crop time after potting	7-9 weeks
Finished plant shipping month	August-March
Plant height	20-25 cm

Viola x wittrockiana (Pansy)

The large flowered Delta® series is known the world over for its versatility in both autumn and spring production. This market leading series has a strongly basal branching habit that resists stretching, so plants require fewer PGRs and hold longer at retail. Strong uniformity in vigor between all the colors in the series and early flowering with a tight bloom window distinguish Delta® from the competition. The Delta® series is ideal for production in 9-11 cm pots and packs.

Germination rate	Raw: 90%, PreNova®: 92%

NEW
2017

Bergenia cordifolia

Short flower stems, compact growth and triple as much branching than the traditional varieties make this variety the first choice for professional Perennial growers.

Rose

Pristar

NEW
2017

Campanula carpatica

First year flowering series with extra large flowers, vigorous plants and best earliness. Programmable for flowering from June to early August.

White

Light Blue

Deep Blue

Swinging Bells

Campanula cochleariifolia

Rockgarden plant for Summer and Autumn flowering in 11–14 cm pots.

Filligree

Campanula garganica

Filligree is the first 1st year flowering *Campanula garganica* on the market. Filligree combines masses of small, star shaped light blue flowers with a compact, Mounding habit and great uniformity. Filligree is suitable for 11-14 cm pot and fits well in mixed Summer pot arrangements.

Filligree

Bellefleur

Campanula glomerata

Bellefleur shows short, erect flower stems with bunches of deep blue flowers just above the foliage. The plant has a compact, well branched habit and does not need vernalization for 1st year flowering.

Blue

Award Winner

Clockwise

Campanula portenschlagiana

First F1 hybrid *Campanula portenschlagiana* from seed. Very uniform, very fast growing variety with strong blue bell shaped flowers for pot size 11-14 cm.

Deep Blue

Cambell

Campanula rapunculoides

Tall stems with large, blue, star shaped flowers, suitable for larger pots. Another 1st year flowering perennial.

Blue

Andiamo

Coreopsis grandiflora

Andiamo is the first F1 hybrid in this Summer flowering species. Vigorous, well branching plants. Less sensitive to breaking. Great uniformity, fast pot fill and all season flowering. Best for pot size 13 cm and larger.

Yellow with Red

Cyberia

NEW
2016

Cyclamen coum

Finally a Cyclamen coum series available in separate colors and with a controlled growth. Very winter hardy and flowering in the late Autumn and in early Spring. Great impulse item, 'botanical' or 'natural' appearance.

Deep Rose

Canaries

Erysimum Hybridum

A real 'must have' item for all perennial growers and retailers that want to start the sales season early Spring. This very early flowering Erysimum is one of the first crops to show color. Ideal to use in mixed containers. Great shelf life, as the plants do not stretch like other Erysimum varieties.

Yellow

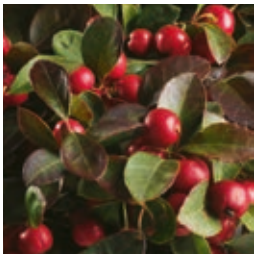

Winter Pearls®

Restricted distribution

Please contact your Syngenta Flowers representative

Gaultheria procumbens

The new standards in the market for uniformity and healthy starter material. Red Baron is ideal for the overwintering culture in larger pots. Big Berry works also in a 1 year culture. It has extremely large berries that are situated on top of the plants, giving a great appeal to the consumers.

Red Baron

Speedy Baron

Big Berry 'GAUBI'

Marvelous Marble

Heuchera americana

A seed raised Heuchera that shows interesting leaf colors throughout the season. Is it cold: leaves are purplish. Does it get warmer: leaves show the nice silver-marble pattern.

Marvelous Marble Silver

Marvelous Marble

Coral Forest

Heuchera sanguinea

A first year flowering perennial with shorter stems and a more intense rose color. Vernalization is beneficial and will result in even more flower stems.

Coral Forest

Tahoe

Iberis sempervirens

Award Winner

Tahoe is an excellent, early and uniform Iberis selection for high quality pot production. Tahoe is compact, well branched and has short flower stems. It is free flowering with very long lasting flowers, leading to an eye-catching amount of white in the garden.

Tahoe

Tahoe Imp.

Everest®

**NEW
2016**

Leontopodium alpinum

Award Winner

First hardy edelweiss on the market that can be grown as an annual plant. Everest® produces numerous star-shaped silver-white flowers amid bright green leaves. The plant remains compact and is extremely suitable for cultivation in pots and mixed planters. Everest® starts flowering later in Summer.

Everest®

Hidcote

Lavandula angustifolia

The traditional variety for a overwintering culture. Hidcote needs vernalization and will flower abundantly in June. This selection is very uniform in habit and earliness.

Blue Strain

Blue Scent®

Lavandula angustifolia

This first-year flowering *Lavandula* has a very compact and uniform habit. The attractive flowers make this unique product an ideal item for the impulse market. This series performs extremely well in balcony and patio containers and its sweet aroma will add to its impulse value. It can also be used as a bedding plant in the garden. Blue Scent® is advised to use for late Summer flowering. Blue Scent® Early performs best for Spring and Summer flowering in a very short production cycle.

Blue Scent® Early

Blue Scent®

Blue Scent® Imp.

White Scent® Early

Our Cyclamen series positioning

Cyclamen Type

Mini

5 to 12 cm pot

Flowering Period

June - October

**SeeWhy®**

- heat tolerant
- most uniform series in earliness
- very compact series
- best shelf life

**Zanetto®**

- most compact mini series in the market
- many very small leaves

June - March

**Snowridge Mini**

- first mini Cyclamen with striking white edged flowers
- suitable for all year round production
- for indoor and outdoor use

**Midori Synchro**

- heat tolerant series
- compact growing
- many flowers centrally in the plant
- most uniform selection within Midori

October - March

**Silverado**

- standard mini Cyclamen for silver leaved types
- strongest type for outdoor use
- ideal for indoor, especially at Christmas time

**Winfall®**

- ideal series for Autumn and Winter production
- good Botrytis tolerance
- easy growing under low light and low temperatures

Legend

= silver leaved

= green leaved

Syngenta Flowers' assortment can be divided by flower size into mini, intermediate and large flowered types. Within each segment, we have bred series for various pot sizes and for the different Flowering times. Use the table below to select the series best suited for each season.

Midi

10 to 14 cm pot

Laser Synchro

- intermediate flower size on a compact plant
- earliest and most uniform series in the market for Autumn and Winter

Large

11 to 19 cm pot

Perfetto Synchro

- most compact large flowered Cyclamen for mass production
- short culture time
- great uniformity
- short flower stems

Sierra Synchro

- standard large flowered Cyclamen for Autumn production
- very early and uniform flowering

Snowridge Midi

- compact plants with many small leaves enable high density growing
- earlier than comparable types

Friller®

- earliest, large flowered fringed type in the market
- special flower shape

Snowridge Maxi

- round plant habit with many leaves
- largest flower in this type

Laser Synchro

- intermediate flower size on a compact plant
- earliest and most uniform series in the market for Autumn and Winter

Rainier

- the best large flowered Cyclamen for Autumn and Winter production
- grows at low temperatures and under lower light conditions

Winter Ice

- real unique large flowered type
- silver leaved and strong colors for a great color contrast
- ideal for Christmas sales

Fleur en Vogue

- real unique variety
- novel flower shape that gives the plants a true exclusive look
- large, umbrella shaped flowers with clear white center
- exclusive design label

Cyclamen selection table

Large flowered are also suited for outdoor use in Southern European weather conditions.
For Northern Europe outdoor use we recommend mini and intermediate types

Series	Pot size (from - to)	Foliage color	Vigor within segment	Outdoor Score (1-5)	Time from sowing to flowering	Best suited flowering period
Zanetto®	5-9 cm		compact	5	24	June - October
SeeWhy	5-11 cm		compact	5	24	June - October

Snowridge Maxi	12-16 cm		medium	4 ¹⁾	30	August - December
Winter Ice	13-19 cm		medium - vigorous	3 ¹⁾	32	October - December
Friller®	12-16 cm		medium	2 ¹⁾	34	October - December
Fleur en Vogue	12-16 cm		medium	2 ¹⁾	33	October - December

The total culture time of Cyclamen depends on the series, and the time from potting to flowering depends on the plug size. The table below is designed to help with scheduling the right flowering moment. It gives guidance on the sowing and potting dates for each season and series. Culture time is subject to local growing conditions and can vary depending on location. For more detailed guidance, please consult our Cyclamen crop manual or contact one of our crop specialists.

Ahead of their time.

SeeWhy®
Mini Cyclamen.

Earliness

Developing early – up to 7–10 days faster build-up

- + Worry free production with our early Cyclamen

Compactness

Developing compactly – perfect harmony between flowers and plant

- + Stays compact even in full bloom

Uniformity

Developing uniformly – high uniformity within 3 days

- + aligned flowering windows within and between the colors

SeeWhy®

NEW
2017

Cyclamen persicum Mini

The newest and most uniform compact and heat tolerant series for Summer and Autumn production. All colors match in earliness and plant habit. They stay compact and have a great shelf life due to the non-stretching habit.

Germination rate	85%
Product form	Raw
Pot size	5-11 cm
PGR	No
Crop time after potting	10-12 weeks
Finished plant shipping month	June-October
Plant height	15-25 cm
Flowering time	June-October
Note	Consumer use indoor and outdoor!

Please contact your Syngenta Flowers representative

Schizanthus x wisetonensis

Atlantis® is an ideal spring pot plant. This variety easily produces compact, well-branched uniform flowering plants. Pot sizes from 11-14 cm can be used and optimum quality will be obtained with a cool culture. Atlantis® is less day length sensitive, which means it can easily be brought to flowering much earlier in the season than other varieties without stretching the plants.

Germination rate	75%
